

HEAT RECOVERY VENTILATION SYSTEM

Advanced Mvr For Comfort Living

EPP HOUSING

The most efficient in heat & sound insulation

FEATURE

- ✓ Heat Recovery Efficiency up to 97%
- ✓ High Static Pressure Energy Saving EC Motor
- ✓ Counter-flow Heat Recovery Core
- ✓ Summer Bypass Integration
- ✓ Independent Fan Speed Control
- ✓ 30mm-45mm Internal Heat and Sound Insulation
- ✓ Ultra Silent Operation
- ✓ Automated Frost Protection
- ✓ Vertical / Horizontal Installation
- ✓ Service Panels on Both Sides
- ✓ Same Unit for Left or Right Orientation Installation
- ✓ Internal Temperature / Relative Humidity Sensors
- ✓ Optional Electrical Heaters Integration
- ✓ Compact Design / Comfort Design
- ✓ EU1253/2014 ErP2016 ErP2018 EcoDesign Compliant

Easy Duct Connection

G4 Filter

EC Energy Saving Motor
(High Static Pressure)

F8 Filter

Counter-flow Heat Exchanger * 2pcs
(Polymer & Graphene | Anti-mold | Washable)

HIGH Efficiency

Heat Recovery

Counter-flow plate heat exchanger (no moving parts), with an optimal distance between layers to ensure a high heat recovery efficiency and a smooth movement of the airflows. Material with Graphene used further enhances heat recovery efficiency. The core is washable and durable, anti-mold, anti-viral and anti-bacterial.

EC Motor

Energy Saving

High performance Variable Speed Drive (VSD) EC motor has the features of low power consumption, quiet and high static pressure. This not only reduces the long run electricity cost, but also ensures the air delivering to the room is sufficient after ducting.

Filters

Multiple Options

G4 extract filter and G4 supply filter are fitted as standard. F8 supply filter is optional. H11 supply filter is available upon request (H11 filtering efficiency of PM2.5 is >99.9%).

Boost Function

Rapid Circulation

Boost ventilation is a function that can be triggered when indoor needs a fast circulation of air with outdoor fresh air. When the IAQ is bad, or indoor humidity is high, boost function can be triggered to ensures pollutants are extracted immediately at the highest fan speed. Up to 10 external boost switches can be connected to the control system.

Bypass Damper

Integration

Built-in bypass damper for summer bypass (free-cooling), without exchanging the heat at the heat exchanger, the fresh air with comfortable temperature level from outdoor can be delivered into the room directly.

ON-SITE Inversion

Flexible Installation

Service panels are on the both sides, left or right installation can be adjusted at site to meet different installation requirements. A quick and easy process allows the system to be inverted on-site, changing the external duct connections from the right to the left of the system as required for specific property types thus minimising ducting runs, system pressure and installation time.

CP8 CONTROL SYSTEM

- ✓ Comprehensive Control System
- ✓ HD 7" Color Touchscreen with Real-time Indoor Air Quality Display
- ✓ Variable Speed Local Demand Control
- ✓ Modbus RS485 Smart Home Connection
- ✓ IAQ Sensors CO₂ / PM2.5 / VOCs / TEMP / RH
- ✓ Weekly Scheduled Operation
- ✓ Optional Fans Separately Control
- ✓ Multiple External CO₂ / RH / TEMP Sensors Connection
- ✓ Multiple External Boost Switches Connection
- ✓ Bypass / Defrost / IAQ Automation
- ✓ APP Remote Control Available
- ✓ Filter Countdown / Replacement Notification
- ✓ Complete Settings on Control Panel
